

## Wound Care Program

The assessment and continuation of care for skin breakdowns resulting in the need for inpatient wound care management to prevent additional wound care complications and promote healing.

### Program Features:

- Collaboration with a Wound Specialist Physician
- Dedicated & Certified Wound Care Nurses
- Treatment protocols featuring nutrition interventions, electronic stimulations, ultrasound, pulse lavage, MIST therapy and wound vac treatment
- Physical & Occupational therapy evaluations & treatment available up to 7 days a week
- Wound-trained interdisciplinary team evaluation and review
